Gmt! iAssociates have said about the

NEW PRODUCT announcements...

their words...not mine.

So, you get the picture, please, please get on the call – so many new things were launched, including a suite of products for myhandpc. A SUITE OF PRODUCTS!

By the way, myhandpc is not some weak, little, wimpy storage device, anyone can get one of those...myhandpc is a complete operating system...literally a pc in your hand...get it...myhandpc...even a football player can get that one.

So, there is MEGA new stuff about that too...so much.

**Get on the CALL! Don’t miss out – and it’s going
to be repeated and recorded.**

Let me put it this way – the meetings, and Q&A, went all night long, and we drove the CRUISE folks

crazy because people would not leave the meetings – and they were total marathons of information, learning and strategic positioning for YOU to BREAKTHROUGH to massive levels of new achievement.

All getting ready for TODAY – the CALL!

Ok, let me see if I can give you a quick analogy that makes this clear as a bell...

...ok, here's a good one. Simple.

Ok, folks are getting crushed by the rise in energy costs and gasoline...EVERYONE. And, I know some places around the country where the price of gas is \$2.00 per gallon.

Now, this is how big gmt! EMS is...watch this...

...suppose you opened up a gas station, today...and for some amazing reason, you were able to sell gas for 20-30% less – that would be like selling gas for \$1.49 per gallon!!!!!!!!!!

How hard would it be to sell your gas???

I mean think about it...you could do everything wrong, even be the GRUMP, or GRINCH, and you will still SELL OUT. Customers would find you and they would buy all the GAS you've got.

Or maybe gas prices are \$1.59 per gallon, that would mean that you could sell your gas at \$1.19 per gallon.

You get the picture.

Everyone has to buy gas...everyone has to buy ENERGY!

And do you know what that savings would add up to over the year? Literally hundreds of dollars.

We are talking about a household fixed cost reduction that would literally pay for itself with money left over!

1. Not to mention all the builders who would love to include this in their home selling packages.
2. How about the Home Builders Associations.
3. How about electricians, contractors, etc., who are always looking for an additional item to upsell and increase value added services.
4. Or what about those small family restaurants who are like the “back-bone” of all communities across the country, and they survive by using every sensible and thrifty savings device possible.
5. And what about the baby boomers and even senior citizens who's biggest fixed cost is ENERGY, and the savings will now allow them to get improved health care.
6. As my friend Charlie would say...that's fishin' money, with enough left over for Thursday night bowling... (seriously)
7. Or what about that small family that needs another car to take the pressure off in the morning, and they have been living under the pressure of knowing that they are only \$40 or \$50 a month away from being able to have that car that would totally take the pressure off... (the savings can be so much more).

Or what if you are a retired NFL player, with 8 children, married to a wonderful wife, who knows how to stretch the budget...and we run around turning off lights, fans, TV's and radios that get left on, with 5 teenagers running in and out. And, we have 10 loads of laundry we do every day, not to

mention 3 refrigerators, two hot water heaters, and 8 computers, and a small office running at the same time, electric heat, to supplement 4 woodstoves, living in the mountains of NY...

Folks we (the Holloway's) are going to save

literally \$300 - \$400 per month.

And, more importantly, we are going to help other families save money, reduce their costs and take some of the strain off...that's so important.

And for those in business – YOU – once and for all...you are going to experience easy, stone-cold SUCCESS. I don't want to use the words, EASY MONEY...but I don't know what else to call it.

It's almost like selling tickets to a SOLD OUT concert – there's no question that you are going to sell out.

Another weird way to look at this AMAZING SALE – is this.

If you could buy \$20.00 bills for \$15.00,

how many would you buy?

Or maybe, I should say it this way -

Now picture this...you give me \$15.00, and I give you \$20.00. Now, you give me \$15.00, and I give you another \$20.00.

And just picture a long line of people, who cannot wait, standing in a long, long, long line with their \$20.00 bill – and all you have to do is give them \$15.00 dollars.

My only question is – could you sell the \$15.00?

(That's pretty clear too me...at least that's what I think.)

Ok, I told you a million times – it was going to be big!

That's why you MUST GET ON THE CALL!

[Click here for my pictures from the cruise](#)

I told you it was going to be the easiest product to bring to market.

Have you ever met one of those people, who can

turn everything into a train wreck?

You know what I mean?

It's like that angry sales person, who does everything wrong, and can't even get the presentation right, and breaks every sensible rule of selling, and on top of this – they are late for appointments, they cannot remember the prospect's name, they forget to even remember the product benefits – and they are rude.

Ok...even that person can sell this product.

The gmt! EMS – is totally bullet proof.

Anyone can sell this.

In fact, I double dare you to go down to the local coffee shop, and do everything in the world to NOT sell the Energy Management System.

I want you to tell everyone in the room what this product does – and then I want you to tell them not to buy it, and I want you to tell them NOT to get in the business, and I want you to tell them that YOU don't have a clue on how to sell it, and I want you to assure them that YOU will not be giving them any back-up, no support, no training, no information – and walk out of the room, WITHOUT giving them a card.

Guess what?

The gmt! Energy Management System will sell.

And let's just say, you are semi-rude, and you spend the rest of the afternoon on the phone, convincing all your friends NOT to buy the gmt! EMS...and then you start making your list on all the reasons why this "deal" won't work, and that everything is all "messed up", and that you are going to sit back and wait and see, and you are going to crank up that ol' skeptical engine that chews up inspiration – and spits out frustration, stress and despair...to the point where no one wants to be around YOU.

Guess what?

The gmt! EMS will still sell.

And let's say, this particular week you are extra grumpy, telling another sad story why the gmt! EMS is a dumb product...and you don't know how to sell it.

And just watch what will happen.

When you get 4 orders the first week – and sell 4 units, and gmt! sends you a fast start bonus check of \$1600.00.

And don't worry, if you don't get it – some of these folks will.

(You should have seen everyone on the CRUISE when this announcement was made. We went way past APPLAUSE!...that's how it started out - then the more they listened and took notes...the quieter it got...you could have heard a pin drop, except that people's hearts were beating so loud...and then there was just this jaw dropped, stunned wide-eyed look...because everyone could see how big the picture was.)

Well how much bigger is it?

Ten times bigger than before for sure.

Then Jim Fobair, from California, started explaining the compensation plan – and everyone started cheering when Jim unveiled this massive wealth building machine.

I mean, just think about it for just one minute – a product that every household needs. (I don't know how Bruce managed to lock it up so fast, talk about a high paced, forward thinking visionary.)

Anyway, I can't cover everything here, and I know I am missing a bunch of stuff, so please, whatever you do, even if you have to crawl over glass, drink castor-oil, drink orange juice after you eat Captain Crunch – please get on the call.

DO NOT MISS OUT.

Don't be left on the OUTSIDE looking IN.

Ok, here are some more testimonials from the CRUISE. Just, giving you the facts folks. And, I really did not even cover myhandpc, and that's a home run, landslide victory, in itself...all by itself...1% market penetration is 6 Billion with a B dollars.

Ok, here they are.

By the way, please forgive me for this letter being kinda choppy, I've got tooth picks holding my eyes open right now...as if anyone got any sleep on this cruise.

Seriously, you should have seen all the empty sunbathing chairs on the deck, and all those CRUISE folks that bring you food and drinks and whatever else...they were just standing around, wondering what to do.

Why?

Because everyone was inside, learning, building their business and getting as much information as possible to get ready for TODAY's massive announcements.

And, believe you me...I tried to stay up, until 4 a.m. with Bruce to finish all those meetings...but I had to go to bed and get some sleep, or at least try to. So, excuse me for being semi-selfish and grabbing 3 hours of sleep.

Slacker...I know.

Anyway, here are more testimonials.

Gotta run...Brian!
