

(fax received from M. H. - Pennsylvania)

To Whom It May Concern:

Three years ago, my wife and I were involved in the AMWAY Business. We were recruited under the Harties-Yeager Organization by Jimmy Morris and Jimmy Dolinger, who were also my partners in the police force. I have been a police officer for 11 years and my wife is a teacher. We were showed the business plan and told that if we followed the system which is reading the books, listening to the tapes, attending the seminars, and showing the "plan" we will be financially successful. My wife and I thought that it was too good to be true. It sounded easy. We remember saying "we could do it." We are hardworking people and because we want the best for our children, we are willing to work hard to be financially successful. We were bombarded with pictures of the people in the business who are living in luxury which is made possible by the business. We were brainwashed that we should dream and all our dreams will come true if we follow the proven system of the business.

When we joined AMWAY, we were strongly advised to buy the books and tapes and attend seminars because these are necessary to ensure our success. We bought the weekly tapes and the books. We listened to the tapes and read each of the books. We attended the seminars in three different states. We drove to Michigan from Philadelphia because we didn't want to miss a thing. We wanted to be successful. We have accumulated over three hundred tapes which cost about \$5.00 each and owned many books which were also expensive. We bought a lot of supplies from AMWAY for our AMWAY business. We invested our time and money and put ourselves in debt because of it. We never got any monetary gain as promised. We were told lies. We did everything we were told, we showed the plan, bought and listened to the tapes, read the books, and attended seminars. We were so religious about the system that we made it to the EAGLE level. We showed the plan to hundreds of people and recruited many of them. We spent hundreds of dollars for phone calls here and abroad for the business. All this hard work gave us nothing but debt. The whole experience was a great disappointment and we lived a lie. We feel cheated and fooled by the people In the AMWAY business.

Very truly yours,

M H of PA
